

About Pradeep Metals Limited

Pradeep Metals Limited (PML) is a Navi Mumbai-based, BSE-listed precision engineering company with over four decades of experience in manufacturing closed-die steel forgings and fully machined components. Its integrated capabilities span product and die design, tooling, forging, heat treatment, testing and precision machining, enabling customised solutions for international OEM customers across valves, instrumentation, oil & gas, petrochemicals, process industries, off-highway vehicles and general engineering. Recently, the company announced a greenfield expansion of defence products, expected to start production in 2027. The company is certified to AS 9100D, ISO 9001, ISO 14001, ISO 45001, PED, ISO 27000 and NORSOK standards. The company exports over 65% of the production.

Sustainability, health and responsible business practices are central to PML's operations. The company has developed an environmentally sustainable manufacturing model supported by renewable energy, water conservation, effluent treatment, recycling and near-zero discharge initiatives. Its commitment to green manufacturing, ethical conduct and fair business practices has been recognised through several industry sustainability awards and the prestigious Jamnalal Bajaj Award for Fair Business Practices.
